ABOUT ME

I am an aspiring software developer driven by curiosity and a passion for building impactful solutions. With a solid foundation in web development, databases, Git, and agile practices, I thrive on learning fast and adapting to new challenges. I'm eager to join a collaborative team where I can contribute from day one, grow as a professional, and turn challenges into real opportunities for innovation and value. Above all, I aim to build a career defined by continuous growth, creativity, and meaningful impact through technology.

SKILLS

🖥️ Frontend
✔ HTML5 | CSS3 |SCSS| JavaScript | Angular | React | TypeScript

⚙️ Backend
✔ Node.js | Express.js | MySQL | MongoDB
✔ APIs RESTful | Docker

🔗 More Skills
✔ Git | GitHub | jest
✔ Metodologías Ágiles (Scrum, Kanban)|Gestion de Proyectos
✔ Clean Code & SOLID Principles

EDUCATION

Software Analysis and Development Technologist
SENA
2024-Present

- I manage technical documentation and development workflows aligned with best practices. I adapt seamlessly to both frontend and backend development, delivering complete, functional, and scalable solutions.

- One of the stacks I have worked with most extensively includes JavaScript, React, Node.js, MongoDB, Express.js, and REST APIs—technologies that I continue to use actively in my graduation project.

- I have a B1 level of English that allows me to read and understand technical documentation, communicate with international teams, and adapt to collaborative environments. I am currently continuing my studies to reach a B2 level.
